DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see pages 11-13, filed 06/05/08, with respect to claims 1-12 have been fully considered and are persuasive. The rejections of claims 1-12 has been withdrawn.

Allowable Subject Matter

1. Claims 1-12 are allowed.

2. The following is a statement of reasons for the indication of allowable subject matter: Claims 1, 2, 7 and 10 of the current application teaches similar subject matter as Asano US 2004/0160454. However, claims 1, 2, 7 and 10 is allowed for the reasons pointed out by Applicant's remarks pages 4-7. Prior art of record has failed to teach of a first and second color conversion definition, that defines a first and second device, are coupled with one another, wherein each of the first and second color conversion definition has a space conversion section defining an association between the coordinates of the device color space on a color reproduction area representative of colors capable of being reproduced. An area decision section that decides whether the two coupling areas for the first and second conversion definition are identical, a definition coupling section creates a coupling color conversion definition when the area

decision section decides that the two coupling areas are identical, the first color conversion definition, the second color conversion are coupled and if the two coupling areas are not identical, the first and second color conversion definition are coupled together with a conversion algorithm for converting coordinates from one to another of the two color reproduction areas.

3. It follows that dependent claims is inherently allowable for depending on an allowable base claim.
